## Abstracts

According to our (Global Info Research) latest study, the global Hoverboard market size was valued at USD 1670.4 million in 2023 and is forecast to a readjusted size of USD 2195.3 million by 2030 with a CAGR of 4.0% during review period.

The hoverboard is a battery-operated, self-balancing device, which is mainly used for recreational activities and personal mobility. Hoverboard has made significant advancement after the first-generation hoverboards were released in 2014. The advanced features, such as Bluetooth connectivity, GPS system, integrating hoverboard with smartphones, etc. are being added in hoverboards.

The formation of trade alliance by Chinese hoverboard manufacturers is expected to be one of the major factors that will have a positive impact on the growth of the market. In China, over 100 Chinese hoverboard manufacturers have introduced trade association called the Hoverboard Industry Alliance in 2017. The objective of this alliance is mainly to work with the organizations that set safety standards for hoverboard and patents in the US, China, and other countries. This will help hoverboard manufacturers to get assistance on UL certification on exporting hoverboards to the US that is required by most of the US retailers. Moreover, this alliance also communicates constantly with UL and CPSC to bring in and enforce safety standards. The formation of this alliance will offer guidance to the Chinese hoverboard manufacturers to meet the stringent safety norms and raise the sales of their products.
