## Abstracts

HPLC is High Speed Power Line Communication is a broadband power line carrier technology for data transmission over low voltage power lines. Broadband power line carrier communication network is a communication network that uses power lines as a communication medium to achieve convergence, transmission and interaction of electricity information for low-voltage power users. HPLC technology has a larger bandwidth and higher transmission rate than traditional low-speed narrowband power line carrier technology, and can meet the higher demand of low-voltage power line carrier communication.
