## Abstracts

According to our (Global Info Research) latest study, the global HPLC Columns market size was valued at USD 1378 million in 2023 and is forecast to a readjusted size of USD 1935.9 million by 2030 with a CAGR of 5.0% during review period.

High-performance liquid chromatography (HPLC) is a technique in analytical chemistry used to separate, identify, and quantify each component in a mixture. It relies on pumps to pass a pressurized liquid solvent containing the sample mixture through a column filled with a solid adsorbent material. Each component in the sample interacts slightly differently with the adsorbent material, causing different flow rates for the different components and leading to the separation of the components as they flow out of the column.

Global core HPLC columns manufacturers include Agilent, Waters Corporation and Shimadzu Corporation etc. The top three companies hold a share about 42%. North America is the largest production area, has a share about 56%, followed by Europe and Japan, with share 20% and 13%, separately. The largest market is North America, holds a share about 43%, followed by Europe and Asia-Pacific, with around 29% and 22% market share respectively.
