## Abstracts

Human embryonic stem cell research has emerged as an important platform for the understanding and treatment of pediatric diseases. From its inception, however, it has raised ethical concerns based not on the use of stem cells themselves but on objections to the source of the cells?specifically, the destruction of preimplantation human embryos. Despite differences in public opinion on this issue, a large majority of the public supports continued research using embryonic stem cells.

### SCOPE OF THE REPORT:

This report studies the Human Embryonic Stem Cell (hESC) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Human Embryonic Stem Cell (hESC) market by product type and applications/end industries. Maintenance of developmental potential for contribution of derivatives of all three germ layers is an important feature of these cells. This ability remains consistent even after clonal derivation or prolonged undifferentiated proliferation, thus pronouncing its accelerated uptake.

In addition, these are capable in expressing high level of alkaline phosphatase, key transcription factors, and telomerase. These factors are found to be of great importance in the maintenance of the inner cellular mass pluripotency.

The global Human Embryonic Stem Cell (hESC) market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Human Embryonic Stem Cell (hESC).

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
