Abstracts

An HVAC control system is used for regulating the temperature, humidity, and airflow within a building to provide thermal comfort to occupants. HVAC systems ensure enhanced air quality in residential and commercial establishments through ventilation and filtration, thereby ensuring thermal balance. These systems use heat exchangers, pumps, and fans to control and regulate humidity and temperature levels.

Scope of the Report:

This report focuses on the HVAC Control Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The HVAC controls market for commercial application is expected to grow at the highest CAGR between 2018 and 2023. The rise in the adoption of smart buildings and green buildings increases the use of smart sensors and HVAC control equipment, such as programmable thermostat, which would save a lot of energy in these buildings. The application of HVAC controls in commercial buildings ensures switching on or off the HVAC equipment in a particular area, which is not currently occupied. In a huge commercial complex, all the areas are not constantly occupied by a number of people; hence for sensing occupancy of the people in an area, HVAC controls play an important role by enabling efficient use of energy.

The HVAC controls market in APAC is expected to grow at the highest CAGR between 2018 and 2023. Among major countries in APAC, China is contributing immensely to the HVAC controls market. China is one of the fastest-growing economies in the world according to an announcement made by International Monetary Fund (IMF) in 2017. It also has a large construction industry, which is driven by the need to meet the

increasing demand for HVAC in the country.

The worldwide market for HVAC Control Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
