According to our (Global Info Research) latest study, the global HVAC Rental Services market size was valued at US\$ 5829 million in 2025 and is forecast to a readjusted size of US\$ 8937 million by 2032 with a CAGR of 6.3% during review period.

HVAC Rental Services refer to the leasing of air conditioning, heating, ventilation, and air purification systems by businesses, organizations, or individuals to meet temporary or long-term environmental control needs without the direct purchase, installation, and maintenance of high-cost equipment. This service is typically provided by professional HVAC equipment rental companies or engineering service providers, covering central air conditioning, portable air conditioners, chiller units, air handling units, and intelligent control systems. It also includes installation, commissioning, regular maintenance, fault response, and energy efficiency monitoring services, enabling flexible responses to seasonal demands, temporary construction sites, event venues, and business expansion, reducing clients' capital expenditures and improving operational efficiency.

With rising standards for comfort and energy efficiency in global building, industrial, and commercial activities, and increasing demand for rapid deployment in temporary projects, event venues, and construction sites, the HVAC Rental Services market is showing a steady growth trend. Particularly in developing countries and regions with extreme climates, the demand for temporary use of air conditioning and HVAC equipment increases during hot/cold seasons. Meanwhile, businesses and government agencies are increasingly favoring leasing models to reduce capital expenditures and maintenance costs. By combining intelligent HVAC systems, IoT device management, and renewable energy integration, leasing services are upgrading from simple equipment provision to comprehensive environmental management solutions. The

market is expected to experience medium-to-high-speed growth in the future, with leasing penetration in commercial buildings and large-scale events gradually increasing.
