## Abstracts

According to our (Global Info Research) latest study, the global HVDC Transmission Commissioning Services market size was valued at US\$ 2527 million in 2025 and is forecast to a readjusted size of US\$ 3836 million by 2032 with a CAGR of 6.1% during review period.

To address the fragmented processes, complex parameter adaptation, and high system commissioning risks inherent in traditional HVDC (High Voltage Direct Current) transmission commissioning, HVDC commissioning services emerged. Since their inception in the early 21st century, the power engineering commissioning field has experienced significant development. Currently, HVDC commissioning services encompass various types of services, including converter station subsystem commissioning, DC field whole-station commissioning, control and protection closed-loop testing, and new energy island access verification. These services are widely used in ultra-high voltage DC projects, flexible DC grids, cross-sea cable interconnections, and large-scale energy base transmission projects, significantly improving commissioning efficiency, system stability, and the ability to ensure on-time project commissioning.
