According to our (Global Info Research) latest study, the global HVDC Transmission Integrated Services market size was valued at US\$ 2527 million in 2025 and is forecast to a readjusted size of US\$ 3836 million by 2032 with a CAGR of 6.1% during review period.

To address the issues of low integration, complex operation and maintenance, and limited efficiency in cross-regional energy allocation in traditional high-voltage direct current (HVDC) transmission systems, integrated HVDC transmission services emerged. Since the advent of integrated HVDC transmission services in the early 21st century, the field of power transmission technology has made significant progress. Currently, integrated HVDC transmission services have evolved into a professional service system encompassing engineering consulting, system design, equipment supply, operation and maintenance outsourcing, and digital monitoring. These services are widely used in long-distance, high-capacity power transmission, offshore wind power transmission, asynchronous grid interconnection, and urban grid capacity expansion, significantly improving transmission reliability, economy, and energy allocation efficiency.
