An HVLP (High Volume Low Pressure) gravity feed spray gun is a type of paint spray gun that operates by using a high volume of air to spray paint at a low pressure. These spray guns are designed to be efficient and environmentally friendly, producing less overspray and waste compared to conventional spray guns. HVLP gravity feed spray guns are commonly used for automotive refinishing, woodworking, and other applications where a smooth, even finish is needed. The low pressure and high volume of air help to prevent the paint from atomizing too much, resulting in a more controlled spray pattern and a professional-looking finish.
