An HVLP (High Volume Low Pressure) pressure feed spray gun is a type of spray gun used for fine finishing and detail work. It operates at low pressure and delivers high volume output, creating an atomized spray that is precise and controllable, with little overspray. HVLP pressure feed spray guns are commonly used for painting projects where a quality finish is preferred, including automotive painting, wood finishing, furniture refinishing, and other detail work. They typically have a lower transfer efficiency rate compared to conventional pressure feed spray guns, but they compensate for this by reducing the amount of material wasted due to overspray.
