A hybrid bond grinding wheel is a type of abrasive wheel that is used in various industries for precision grinding operations. It combines the characteristics of both resin bond and vitrified bond wheels, hence the term 'hybrid'.Resin bond wheels are known for their excellent cutting ability and high resilience, while vitrified bond wheels offer strength, rigidity, and heat resistance. By combining these two bonding systems, hybrid bond wheels can provide a balance of cutting efficiency, wheel life, and heat resistance, making them suitable for a wide range of grinding applications.
