According to our (Global Info Research) latest study, the global Hybrid Generator Set market size was valued at USD 39100 million in 2022 and is forecast to a readjusted size of USD 61560 million by 2029 with a CAGR of 6.7% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Hybrid generator set combines two sources of energy to generate electricity through a battery-charged system and is usually integrated with a diesel generator. The generator will use renewable energy such as solar or wind to charge the battery and serve as the main power source. When the battery levels begin to run low, the diesel generator will step in immediately to generate electricity.
