Abstracts

The global Hybrid Generator Set market size is expected to reach \$ 61560 million by 2029, rising at a market growth of 6.7% CAGR during the forecast period (2023-2029).

Hybrid generator set combines two sources of energy to generate electricity through a battery-charged system and is usually integrated with a diesel generator. The generator will use renewable energy such as solar or wind to charge the battery and serve as the main power source. When the battery levels begin to run low, the diesel generator will step in immediately to generate electricity.
