The hybrid system in automotive constitutes various electric generated systems such as Start-Stop, Regenerative Braking, EV Drive, Others. This system enables the vehicle to reduce the emission which in turn saves the environment from its ill effects. Various components such as Battery, DC/DC Converter, DC/AC Inverter, and eMotor are integrated in the vehicle to increase the efficiency of the vehicle.

SCOPE OF THE REPORT:

This report focuses on the Hybrid System in Automotive in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Furthermore, the government of various countries have taken initiatives to increase the sales of electric vehicles. In countries such as India, Singapore, Indonesia, Brazil, and MEA regions, the government has planned to invest more and welcome several electric vehicles manufacturers to set up manufacturing plants. Companies such as Tesla Motors, Hyundai, Mahindra & Mahindra, Tata Motors and others are leading the race to roll out electric vehicles soon. Apparently, other developing countries have also taken similar initiatives to boost the production of electric vehicles. This will enable an increase in demand for the hybrid system in the vehicle. Moreover, electric car owner doesn?t need any government license and other certification to run the vehicles. The market is expected to reach USD 256 billion by 2023 at a CAGR of 5.98% during the forecast period.
