According to our (Global Info Research) latest study, the global Hydraulic Cylinders market size was valued at USD 5826.7 million in 2023 and is forecast to a readjusted size of USD 8291 million by 2030 with a CAGR of 5.2% during review period.

Hydraulic Cylinders is a kind of hydraulic actuator which converts hydraulic energy into mechanical energy and makes linear reciprocating motion (or swing motion). It is simple in structure and reliable in operation. When it is used to realize reciprocating motion, it can avoid decelerating device, and has no transmission clearance, so it is widely used in various mechanical hydraulic systems. The output force of the hydraulic cylinder is directly proportional to the effective area of the piston and the pressure difference on both sides; the hydraulic cylinder is basically composed of cylinder barrel and cylinder head, piston and piston rod, sealing device, buffer device and exhaust device. Buffer and exhaust devices depend on the specific application, other devices are essential.

The main hydraulic cylinder manufacturers in the market include Hengli hydraulic and Komatsu, and European enterprises occupy a large share in the high-end market. Domestic hydraulic cylinder manufacturers such as Hengli hydraulic, Sany Zhongxing, etc.

The main consumer countries of Hydraulic Cylinders are Europe, the United States, China, Japan and other countries and regions with relatively complete industrial development system.
