According to our (Global Info Research) latest study, the global Hydraulic Door Closers market size was valued at USD 794660 million in 2023 and is forecast to a readjusted size of USD 1013830 million by 2030 with a CAGR of 3.5% during review period.

Hydraulic Door Closer is a mechanical device that uses hydraulic (oil-filled) dampers to limit the speed at which the door closes. Some closers allow for adjustment of the strength of the spring, making it easier or more difficult to push the door open. Choosing a door closer can involve the consideration of a variety of criteria. In addition to the closer's performance in fire situations, other criteria may include resistance to opening forces (for use by disabled or infirm), control over the rate of closing, safety, durability, risk of vandalism, anti-ligature and aesthetics.

The major global producers of hydraulic door closers are Dorma, Geze, Stanley, Hager, Assa Abloy, etc. Dorma leads the industry with about 25% market share. The production of hydraulic door closers is largest in Europe, which accounts for about one third of the market. Asia and North America is the second and third place with 30% and 21% respectively. But the market share of Asia is becoming bigger and has been close to the number of Europe. In terms of consumers, Asia is the largest one at 33%. The market share of Europe and North America is even closer with 21% and 22% respectively.
