## Abstracts

Hydraulic equipment uses pressurized fluid to perform various machinery operations. Different types of fluids, including synthetic fire-resistant, phosphate ester fire-resistant, and petroleum-based fluids are used in hydraulic equipment. An engine is used to drive the pump to pressurize the hydraulic fluid.

Scope of the Report:

This report focuses on the Hydraulic Equipment for Mobile Applications in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The growth in construction activities is one of the primary growth factors for this market. The rise in urban population has resulted in an increase in construction activities across the globe, especially in the developing regions in APAC that are currently witnessing major growth in the infrastructure development and real estate sectors. This will bolster the demand for hydraulic equipment for various construction activities such as the construction of roads, railways, housing, infrastructure, and airports and also fuel the demand for earthmoving equipment such as excavators, loaders, bulldozers, and cranes.

The Americas is estimated to be the major revenue contributor to the market in the next four years. The replacement of hydraulic equipment, parts, and accessories in various industries in the region and the industrial and economic development in South America, will fuel market growth in this region. Also, the focus of the developing countries such as India and China towards the mechanization of agriculture and infrastructure development, will also lead to the rise in exports of agricultural and aerospace

equipment to APAC, in turn, propelling the growth of the market. The worldwide market for Hydraulic Equipment for Mobile Applications is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
