Hydraulic equipment uses pressurized fluid to generate power. The fluid used can be water or oil and the market is segmented on the basis of components into pump and motor, cylinder, valve, and others.

Scope of the Report:

This report focuses on the Hydraulic Equipment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

A major factor driving the growth of the market is the rise in building and construction activities. Construction activities have been growing around the world, particularly in emerging economies. One of the prominent growth sectors in the construction industry is the residential sector where several projects are being initiated. For instance, in 2015, the Government of India announced the Housing for All program, under which the government aims at providing affordable housing by 2023. Under this program, the government will provide tax rebates and interest waivers for home loans.

One trend affecting this market is increasing penetration of digitization and IoT in hydraulic devices. Vendors are integrating IoT technology for predicting hydraulic hose failure or connector leakage. Such rising use of IoT integrated hydraulic devices will propagate the market growth in the forthcoming years.

The Americas accounted for the maximum growth of the hydraulic devices market. With growing infrastructure opportunities in the advanced economies such as the US, this region will continue to dominate the market during the next few years as well.

The worldwide market for Hydraulic Equipment is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million
