According to our (Global Info Research) latest study, the global Hydraulic Hot Stamping Press market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Hydraulic hot stamping machine is a kind of hot stamping equipment driven by hydraulic system. It puts the metal sheet or pipe in the mold, and through the pressure and heat energy provided by the hydraulic system, the metal material is deformed or cut at high temperature, so as to obtain the desired shape and size. Hot stamping forming technology uses the principle of metal thermoplastic forming, which can realize quenching heat treatment of sheet metal at the same time of forming, and improve the forming performance of materials.
