## Abstracts

According to our (Global Info Research) latest study, the global Hydraulic Shock Absorbers market size was valued at USD 92 million in 2023 and is forecast to a readjusted size of USD 112.4 million by 2030 with a CAGR of 3.0% during review period.

Water hammers, also known as hydraulic shocks, are surges of pressure that occur when water in a pipeline system suddenly changes direction. When these occur in your home plumbing system, they usually make loud, annoying bangs. Aside from the noise, they can cause your pipes to vibrate violently and even damage them to the point of causing perforations or bursts at pipe seams, causing water damage and possible flooding in bathrooms, laundry rooms, and basements. Thankfully, water hammer arrestors can be purchased and installed on your existing plumbing system to combat this problem.

Global Water-hammer Arrestor key players include Watts, Sioux Chief, Zurn, Proflo, Amtrol, etc. Global top five manufacturers hold a share about 35%. North America is the largest market, with a share about 50%, followed by Europe and Asia Pacific, both have a share about 20 percent. In terms of product, Copper is the largest segment, with a share about 75%. And in terms of application, the largest application is Residential, followed by Commercial, Industrial.
