According to our (Global Info Research) latest study, the global Hydraulic Spreader market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Hydraulic spreader, a tool used by emergency crews in vehicle extrication.

Hydraulic spreader is two-armed equipment, it uses hydraulic pressure to separate or spread the arms. The two arms are of hydraulic spreader which are designed in such a way that they come together in a narrow tip. This tip can get access to gaps as small as 2mm. The arms of the hydraulic spreader in the closed position can move outwards on a press of the button, using hydraulic pressure and applying outward force. It is used in accidents and also during pipeline construction or pipeline decommissioning, replacement of valves or maintenance of flange joints among others.
