Abstracts

Hydroexcavation is a non-destructive excavation method that uses high-pressure water jets to loosen soil and other materials, and then sucks the loosened material into a vacuum suction system. This excavation method is safer than traditional mechanical excavation and will not damage underground pipelines and other sensitive facilities.

Hydro Excavation Vacuum Trucks are specialized trucks used for hydraulic excavation and vacuum suction. This type of truck is usually equipped with high-pressure water jetting and vacuum suction equipment and is used for digging and clearing underground pipes, cables or other underground facilities.
