## Abstracts

According to our (Global Info Research) latest study, the global Hydro Fiber Pads market size was valued at US\$ 3612 million in 2025 and is forecast to a readjusted size of US\$ 5903 million by 2032 with a CAGR of 7.5% during review period.

Hydro fiber pads are advanced wound dressings made from highly absorbent cellulose-based fibers that transform into a cohesive gel upon contact with wound exudate, maintaining a moist healing environment while effectively managing fluid and reducing the risk of maceration. These dressings are widely used for moderate to heavily exuding wounds, including chronic ulcers, surgical wounds, burns, and traumatic injuries, across hospital, outpatient, and home-care settings. In 2025, the average selling price of hydro fiber pads is approximately US\$6.5 per unit, with global sales volume reaching around 540 million units. The industry maintains a gross margin of 50%–72%, supported by strong clinical acceptance, superior exudate management performance, recurring usage, and inclusion in standardized wound-care protocols.
