Abstracts

Hydrocephalus, known as 'water on the brain' is a disorder caused by the accumulation of cerebrospinal fluid in the cavities (ventricles) deep within the brain. This causes an increase in the size of the ventricles and pressure on the brain that leads to brain damage. Ventriculo-peritoneal valves are devices that drain the extra fluid from the brain into the peritoneal cavity, in the abdomen, where the fluid can be absorbed (a ventriculo-peritoneal shunt).
