Abstracts

A hydrogen aircraft is an airplane that makes use of hydrogen (liquid or gas) as a power source. Hydrogen's energy can be harnessed in two ways for a hydrogen aircraft. It can either be burned in a jet engine or other sorts of internal combustion engines, or it can be used to power a fuel cell to generate electricity to power the propeller of the aircrafts. Research into hydrogen as a potential fuel to power zero-emission aircraft has been on rise in the recent years.
