Hydrogen chloride (HCl) gas analyzer is a professional device used to detect the concentration of hydrogen chloride gas in the environment. It is widely used in industrial safety, environmental monitoring and chemical production. The instrument measures the concentration of HCl gas in real time (unit: ppm or mg/m³) through electrochemical sensors, infrared spectroscopy (IR) or laser absorption, and has high sensitivity, fast response and anti-interference characteristics. It is commonly used in semiconductor manufacturing, waste incineration, pharmaceutical and other industries for leak warning, emission compliance monitoring and personnel health protection. Some high-end models support network data transmission and remote monitoring functions.
