## Abstracts

According to our (Global Info Research) latest study, the global Hydrogensulfide market size was valued at USD 91 million in 2023 and is forecast to a readjusted size of USD 104.1 million by 2030 with a CAGR of 2.0% during review period.

Hydrogen sulfide, CAS 7783-06-4, is a colorless, flammable, extremely hazardous gas with a “rotten egg” smell. It occurs naturally in crude petroleum, natural gas, and hot springs. In the report, we count hydrogen sulfide existing as a liquid compressed gas. We mainly cover high purity hydrogen sulfide.

Hydrogen sulfide is produced in technical (98.5%) and purified (99.5% minimum) grades. It is commercially available by two typical approaches: recovery from gas mixtures and chemical means. Natural gas and gases associated with crude oil contain varying amounts of hydrogen sulfide from trace amounts to 70–80%. Recovery of hydrogen sulfide from natural gas, manufactured gas operations, or as a byproduct of petroleum refining is the main nonnatural source of hydrogen sulfide. These sources are generally used as raw materials for NaHS. These sources are generally used as raw materials for NaHS. We will analyze this market in detail in 1.8.

In addition, hydrogen sulfide (H<sub>2</sub>S) is a very toxic and pungent gas that causes problems in both the upstream and downstream oil industry and gas industry. Hydrogen sulfide scavengers can remove the H<sub>2</sub>S from the upstream and downstream oil industry and gas to reduce corrosion.

In addition, the price of pipeline transportation H<sub>2</sub>S is also very cheap. We will analyze pipe hydrogen sulfide in 1.9.

Air Liquide, The Linde Group and Praxair are the top 3 manufacturers of Hydrogensulfide (CAS 7783-06-4), with about 82% market shares.

The Global Info Research report includes an overview of the development of the Hydrogensulfide industry chain, the market status of Chemicals (High Pure Gas, Gas Mixtures), Pharmaceutical (High Pure Gas, Gas Mixtures), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Hydrogensulfide.
