## Abstracts

Hydrographic survey is the science of measurement and description of features which affect maritime navigation, marine construction, dredging, offshore oil exploration/offshore oil drilling and related activities. Strong emphasis is placed on soundings, shorelines, tides, currents, seabed and submerged obstructions that relate to the previously mentioned activities.

### Scope of the Report:

This report focuses on the Hydrographic Survey Equipment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Among types, the unmanned vehicles segment is estimated to account for the largest share in the hydrographic survey equipment market in 2017. Growth in the unmanned vehicles segment is attributed to the increased demand for unmanned vehicles from the commercial sector, owing to their application for deep water exploration and production activities, drilling support and pipeline inspection, and hydrographic surveys. Among end users, the commercial segment is projected to be the fastest-growing market during the forecast period in the hydrographic survey equipment market. Increase in dredging operations, pipeline & cable laying, oil & gas exploration, offshore surveys, and drilling activities by commercial companies is expected to drive this segment.

North America is estimated to account for the largest share in the hydrographic survey equipment market in 2018, which includes the US and Canada. The US is leading the market for hydrographic survey equipment in North America. Factors responsible for the leading position of North America are the extensive use of hydrographic survey

equipment in dredging, subsea research activities, and oil and gas exploration in the region.

The worldwide market for Hydrographic Survey Equipment is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
