Abstracts

According to our (Global Info Research) latest study, the global Hydrophilic Foils market size was valued at US\$ 321 million in 2025 and is forecast to a readjusted size of US\$ 396 million by 2032 with a CAGR of 3.0% during review period.

Hydrophilic Foils are industrial roll products in which a durable hydrophilic functional layer is applied to aluminium substrates to enhance condensate drainage and corrosion resistance in heat exchangers and air-conditioning systems. Production in 2024 was 94.55 million square meters and the average price was \$3.30 per square meter. A single production line had an annual capacity of about 500,000 square meters in 2024 and the average gross margin was approximately 12 percent. The upstream of Hydrophilic Foils primarily consists of electrolytic aluminium ingots and rolling mill services, with representative suppliers such as Alcoa, Rio Tinto, Norsk Hydro, Novelis, and Constellium ensuring material quality and process reliability. The midstream focuses on coating formulation development, roll-to-roll coating and drying, surface modification and curing, slitting and converting, and quality and durability testing to maintain long-term hydrophilic performance. Downstream applications include air conditioners, refrigeration, and heat-exchange equipment, with key customers including Carrier, Daikin, Midea, Gree, and Haier.

Hydrophilic Foils play a critical role in enhancing the efficiency and reliability of heat exchangers and air-conditioning systems by ensuring rapid condensate drainage and long-term corrosion resistance. As HVAC and refrigeration industries continue to demand materials that combine durability with precise surface performance, hydrophilic foils have become a key component in achieving system stability and energy efficiency. The sector currently benefits from mature aluminium rolling and coating technologies,

yet faces challenges such as raw material cost fluctuations, process consistency, and margin pressure, which drive differentiation among producers. Companies that can maintain consistent coating quality, precise hydrophilic performance, and reliable large-scale production are positioned to strengthen operational resilience and pricing leverage, emphasizing process control and product specialization as core competitive advantages.

This report is a detailed and comprehensive analysis for global Hydrophilic Foils market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Hydrophilic Foils market size and forecasts, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Hydrophilic Foils market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Hydrophilic Foils market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Hydrophilic Foils market shares of main players, shipments in revenue (\$ Million), sales quantity (Sq m), and ASP (US\$/Sq m), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Hydrophilic Foils

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Hydrophilic Foils market based on the following parameters - company overview, sales quantity, revenue, price, gross margin,

product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Dingsheng New Materials, Jiangsu Alcha Aluminium Group, Henan Mingtai Al. Industrial, Shantou Wanshun New Material Group, Chalco Aluminum, Guangdong Hec Technology, UACJ, Novelis Korea, Shandong Nanshan Aluminum, Shanghai Huaфон Aluminium Corporation, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Hydrophilic Foils market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Hydrophilic Foils Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 8011

1.3.3 1100

1.3.4 1200

1.3.5 3102

1.3.6 Others

1.4 Market Analysis by Coating

1.4.1 Overview: Global Hydrophilic Foils Consumption Value by Coating: 2021 Versus 2025 Versus 2032

1.4.2 Acrylic Resin

1.4.3 Modified Acrylic Resin

1.4.4 Others

1.5 Market Analysis by Thickness

1.5.1 Overview: Global Hydrophilic Foils Consumption Value by Thickness: 2021 Versus 2025 Versus 2032

1.5.2 Thickness
