According to our (Global Info Research) latest study, the global Hydroponic Nutrients and Booster market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Hydroponic nutrients and booster are products specifically formulated to provide essential nutrients and enhance plant growth in hydroponic systems. Hydroponic farming involves growing plants in a soilless environment, where plants receive their nutrients directly from a water-based solution. Hydroponic nutrients are carefully balanced to meet the specific needs of plants, containing essential macronutrients like nitrogen, phosphorus, and potassium, as well as micronutrients like iron, zinc, and calcium. Boosters are additional supplements that can be added to the nutrient solution to promote plant growth, improve yields, or address specific nutrient deficiencies. These products help ensure optimal plant health and growth in hydroponic systems.
