The global Hydroponic Nutrients and Booster market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Hydroponic nutrients and booster are products specifically formulated to provide essential nutrients and enhance plant growth in hydroponic systems. Hydroponic farming involves growing plants in a soilless environment, where plants receive their nutrients directly from a water-based solution. Hydroponic nutrients are carefully balanced to meet the specific needs of plants, containing essential macronutrients like nitrogen, phosphorus, and potassium, as well as micronutrients like iron, zinc, and calcium. Boosters are additional supplements that can be added to the nutrient solution to promote plant growth, improve yields, or address specific nutrient deficiencies. These products help ensure optimal plant health and growth in hydroponic systems.
