Abstracts

According to our (Global Info Research) latest study, the global Hydroxyl-Terminated Polyfarnesene market size was valued at US\$ 89.3 million in 2024 and is forecast to a readjusted size of USD 129 million by 2031 with a CAGR of 5.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The hydroxy-terminated polyfarnesene-based polymers exhibit lower viscosities compared to polydiene-based polymers, such as polybutadiene-based monols or polyols, of similar molecular weight. Therefore, hydroxy-terminated polyfarnesene-based polymers may be handled favorably without significant dilution with other components.
