## Abstracts

According to our (Global Info Research) latest study, the global IBC Cell market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

IBC Cell is a technology that moves both the positive and negative metal contacts of the solar cell to the back of the cell. The battery appeared in the 1970s and was the earliest researched back-junction battery. There is no grid line on the front of the battery, which greatly increases the light-receiving area of the battery sheet, thereby improving the battery efficiency.
