The global IBC (Intermediate Bulk Container) Liners market size is expected to reach \$ 1531.2 million by 2029, rising at a market growth of 3.8% CAGR during the forecast period (2023-2029).

IBC (Intermediate Bulk Container) Liners are removable liners for packaging and transporting liquid, powdery and semi-solid materials. They are often used to be loaded in Intermediate Bulk Containers (IBCs) for extra protection and convenience. IBC liners are usually made of plastic and are durable, corrosion-resistant, leak-proof and easy to clean. They prevent material from coming into contact with the inner surface of the container, thereby avoiding problems such as contamination, cross-contamination and clogging. In addition, IBC liners provide additional protection against liquid spills or powder spills and simplify cleaning and waste disposal.
