Abstracts

According to our (Global Info Research) latest study, the global ibeacon market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The term iBeacon and Beacon are often used interchangeably. iBeacon is the name for Apple’s technology standard, which allows Mobile Apps (running on both iOS and Android devices) to listen for signals from beacons in the physical world and react accordingly. In essence, iBeacon technology allows Mobile Apps to understand their positionon a micro-local scale, and deliver hyper-contextual content to users based on location. The underlying communication technology is Bluetooth Low Energy.

Commercial/Enterprise applications have an enormous untapped potential. We’ve seen a lot of consumer-facing spins on iBeacon deployment, with smaller attention paid to less glamorous applications like inventory management, logistics, and manufacturing.

The Global Info Research report includes an overview of the development of the ibeacon industry chain, the market status of Advertising (Close Distance: A Few Centimeters, Medium Distance: A Few Meters), Indoor Navigation (Close Distance: A Few Centimeters, Medium Distance: A Few Meters), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of ibeacon.

Regionally, the report analyzes the ibeacon markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global ibeacon market, with robust domestic demand, supportive policies, and a strong manufacturing base.
