Abstracts

Irritable bowel syndrome (IBS) is a common disorder that affects the digestive system. IBS is characterized by symptoms such as stomach cramps, bloating, diarrhea, and constipation, which impacts one's everyday life. Although the cause of IBS is unknown, but few factors that cause IBS are severe infection, inflammation in the intestines, muscle contractions in the intestine, changes in bacteria in the gut, and abnormalities in the nerves.

SCOPE OF THE REPORT:

This report focuses on the IBS Treatment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Rising prevalence of gastrointestinal diseases and disorder, geriatric population, unhealthy diet, anxiety, depression, and changing lifestyle in Americas are the key drivers of the Americas IBS market. Moreover, strong clinical pipeline and government support is fuelling the market in this region. According to an updated report by the Anxiety and Depression Association of America, in 2017, the most common mental disorder was anxiety in the United States, affecting approximately 40 million adults over 18 years every year.
