According to our (Global Info Research) latest study, the global Ice Flaker market size was valued at USD 1881.7 million in 2023 and is forecast to a readjusted size of USD 2772.7 million by 2030 with a CAGR of 5.7% during review period.

An ice flaker is a continuous-type ice maker that freezes and dispenses irregular bits of ice simultaneously. Flake ice can be either scale or granular ice. Most flake machines use a stationary evaporator. Flake ice is constantly scraped from the evaporator walls of the ice making machine by a slowly rotating auger.

The recent rise in organized retail outlets is expected to help in ice flaker market growth during the predicted period. It has been noted that the organized retail sector in developed countries like the US and the UK is established and is becoming significantly popular in developing countries such as China, India, and Brazil. The recent change in consumers' lifestyle has led to the high demand for an array of frozen and chilled food, which, in turn, has driven the demand for flake ice from the organized retail segment. Supermarkets, hypermarkets, forecourt retailers, discounters, and convenience stores have multiplied over the years and are investing in better technologies to provide consumers with convenience and chilled food products that are safe to consume. Additionally, it has also been noted that the continuous rise in consumers' income level offers a growth opportunity to the vendors in this market.
