## Abstracts

Identity and access management as a service (IDaaS or IAMaaS) refers to web-delivered services that create and control access levels for individual users. This is one of the many types of cloud services now offered by cloud vendors.

Scope of the Report:

This report studies the Identity and Access Management-as-a-service (IDaaS) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Identity and Access Management-as-a-service (IDaaS) market by product type and applications/end industries.

Strict regulatory compliance and increased budgets by government organizations and large-scale enterprises can augur market growth. Rise of web applications, emphasis on risk management, and cost containment are factors expected to drive market volume. In addition, popularity of Bring Your Own Devices (BYOD) and Internet of Things (IoT) can positively impact the market.

Continuous innovation in technologies have led to developers building solutions such as secure print authentication and access to electric vehicle (EV) charging access. The market can experience an uptick in demand owing to application in sectors such as healthcare, education, manufacturing, etc. Cloud and hybrid solutions are expected to have an impact in the market owing to negligible error rate and advanced security features. Wide availability of IAM options and demand for solutions to preserve and protect data of individuals can lead to its implementation by large-scale enterprises.
