Abstracts

According to our (Global Info Research) latest study, the global IgG Separation and Purification Reagents market size was valued at US\$ 167 million in 2025 and is forecast to a readjusted size of US\$ 359 million by 2032 with a CAGR of 11.7% during review period.

IgG separation and purification reagents are a class of biochemical reagents used to selectively separate and purify immunoglobulin G (IgG) from serum, cell culture supernatants, or other biological samples. They are typically based on the principle of specific binding of affinity ligands such as Protein A, Protein G, or Protein A/G to the Fc region of IgG, achieving highly selective capture and elution of target antibodies. These reagents can be formulated as resins, magnetic beads, membranes, or kits, enabling the production of high-purity, highly active IgG in a short process. They are widely used in downstream purification stages of antibody preparation, immunoassay, functional studies, and biopharmaceutical development. Sales volume in 2025 was 1.25 million vials, with an average price of US\$115 per vial. Total production capacity was 1.4 million vials, with a gross profit margin of 85%.

This report is a detailed and comprehensive analysis for global IgG Separation and Purification Reagents market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global IgG Separation and Purification Reagents market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global IgG Separation and Purification Reagents market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global IgG Separation and Purification Reagents market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global IgG Separation and Purification Reagents market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for IgG Separation and Purification Reagents

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global IgG Separation and Purification Reagents market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Merck, Abcam, Thermo Fisher Scientific, BioRad, Santa Cruz Biotechnology, Cytiva, Yeasen, MedChemExpress, GenScript, Rockland Immunochemicals, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

IgG Separation and Purification Reagents market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume

and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Agarose Beads

Magnetic Beads

Market segment by Purification Purpose

Capture Affinity Chromatography

Intermediate Purification

Polishing Affinity Step

Market segment by Purification Method

Affinity Chromatography

Ion Exchange Chromatography

Others

Market segment by Application

Scientific Research

Biomedicine

Others

Major players covered

Merck

Abcam

Thermo Fisher Scientific

Bio?Rad

Santa Cruz Biotechnology

Cytiva

Yeasen

MedChemExpress

GenScript

Rockland Immunochemicals

Amberlite

Repligen

Sartorius

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

The content of the study subjects, includes a total of 15 chapters:

Chapter 1, to describe IgG Separation and Purification Reagents product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of IgG Separation and Purification Reagents, with price, sales quantity, revenue, and global market share of IgG Separation and Purification Reagents from 2021 to 2026.

Chapter 3, the IgG Separation and Purification Reagents competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the IgG Separation and Purification Reagents breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026. and IgG Separation and Purification Reagents market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of IgG Separation and Purification Reagents.

Chapter 14 and 15, to describe IgG Separation and Purification Reagents sales channel, distributors, customers, research findings and conclusion.

I would like to order

Product name: Global IgG Separation and Purification Reagents Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: <https://marketpublishers.com/r/G0A299D5E62FEN.html>

Price: US\$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
