## Abstracts

The global Ignition Interlock Devices market size is expected to reach \$ 1128 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

An ignition interlock device or breath alcohol ignition interlock device (IID or BAIID) is a breathalyzer for an individual's vehicle. It requires the driver to blow into a mouthpiece on the device before starting or continuing to operate the vehicle. If the resultant breath-alcohol concentration analyzed result is greater than the programmed blood alcohol concentration (which varies between countries), the device prevents the engine from being started. The interlock device is located inside the vehicle, near the driver's seat, and is directly connected to the engine's ignition system.

Global Ignition Interlock Devices key players include Drager, SmartStart, LifeSafer, Volvo, Alcolock, etc. Global top five manufacturers hold a share about 40%. North America is the largest market, with a share about 70%, followed by Europe, with a share about 25 percent. In terms of product, Traditional Type is the largest segment, with a share about 70%. And in terms of application, the largest application is Customers, followed by Commercial.
