Abstracts

The imitation jewellery, as its name implies, is made of precious metals such as gold, silver and platinum, but the shape and effect resembles the precious metal jewellery, and some people call such imitation jewelry as fashion jewelry or popular jewelry. Imitation jewellery is usually made of synthetic gemstones as decorative stones, and a small number of low-grade gem stones as decorative stones. Metal materials for jewelry are usually made of copper or copper alloys. Because copper is not only cheap, but also has excellent casting properties. It is easy to make jewelry with various shapes.
