Abstracts

According to our (Global Info Research) latest study, the global Immigration Outsourcing Services market size was valued at US\$ 25761 million in 2025 and is forecast to a readjusted size of US\$ 44166 million by 2032 with a CAGR of 8.0% during review period.

Immigration outsourcing services refer to full-process cross-border relocation solutions provided by professional immigration consulting firms, law firms, or third-party service providers to individuals or businesses. These services cover visa applications, residence permits, investment immigration, work permits, family reunions, and other immigration-related matters. These services encompass policy consultation, document preparation, application submission, compliance review, and subsequent identity maintenance, helping clients complete the international relocation process efficiently and compliantly.

With globalization, cross-border talent mobility, and dynamic adjustments to immigration policies in various countries, immigration outsourcing services are experiencing continuous growth. On the one hand, the increased demand for asset allocation and identity diversification among high-net-worth individuals is driving the development of investment immigration and family immigration services. On the other hand, the increased demand from multinational corporations for global talent deployment makes corporate-level immigration outsourcing a significant growth area. Furthermore, new policies such as remote work and digital nomad visas are creating new market demands. Although geopolitical factors and tightening immigration policies may cause temporary fluctuations, overall, professional, compliant, and digitalized immigration service agencies will have a greater competitive advantage, and the industry still

possesses steady long-term growth potential.
