Immigration software, also called immigration practice management or immigration case management software, manages legal activities related to immigration cases. These solutions possess similar functionality to general legal practice management or legal case management tools but offer immigration-specific functionality such as built-in connection to immigration-related organizations like United States Citizenship and Immigration Services (USCIS), Department of Labor (DOL), Department of State (DOS), National Visa Center (NVC), etc. Law firms use these solutions. Immigration software also offers the current immigration-specific forms and allows users to manage associated processes.

With the acceleration of globalization and the growth of immigration demand, the immigration software market has gradually emerged and developed rapidly. These software programs primarily offer functions such as immigration policy inquiries, application process guidance, document preparation assistance, and online assessments, helping users conveniently understand immigration information and complete related procedures. The number of immigration software programs on the market is constantly increasing, and their functions are becoming increasingly rich. Some programs even incorporate artificial intelligence and big data technologies to provide personalized recommendations and intelligent review services. However, due to the complexity and variability of immigration policies, the quality of software services varies greatly, and users need to carefully select the right one. Overall, the immigration

software market is still in a stage of rapid development and is expected to further integrate resources and improve the professionalism and accuracy of services in the future.
