## Abstracts

The global Immune Support Vitamins and Supplements market size is expected to reach \$ 2522.7 million by 2029, rising at a market growth of 7.8% CAGR during the forecast period (2023-2029).

The immune support vitamins and supplements market has experienced significant growth in recent years, and several trends are shaping its trajectory. Here are some notable market trends in the immune support vitamins and supplements industry:

- Increasing Consumer Awareness:** There is a growing awareness among consumers about the importance of maintaining a strong immune system. The COVID-19 pandemic has further highlighted the significance of immune health, leading to increased interest in immune support vitamins and supplements. Consumers are actively seeking products that can help boost their immune system and improve overall wellness.
- Demand for Natural and Plant-Based Ingredients:** Consumers are showing a preference for natural and plant-based ingredients in their immune support vitamins and supplements. They are seeking products that are free from artificial additives, preservatives, and allergens. Ingredients such as vitamin C, zinc, elderberry, echinacea, and probiotics are popular choices due to their perceived immune-boosting properties.

This report studies the global Immune Support Vitamins and Supplements production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Immune Support Vitamins and Supplements, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Immune Support Vitamins and Supplements that contribute to its increasing demand across

many markets.

## Highlights and key features of the study
