## Abstracts

According to our (Global Info Research) latest study, the global Immunoabsorption Columns market size was valued at USD 29 million in 2023 and is forecast to a readjusted size of USD 47 million by 2030 with a CAGR of 7.3% during review period.

Immunoabsorption columns have been widely employed for the purification of specific antibodies and antigens. In immunoabsorption columns, plasma is removed by apheresis and passed on through an adsorption medium to remove harmful antibodies, following which it is re-infused into the patient.

Immunoabsorption columns are increasingly being recognised as a promising and low-risk therapy option in a variety of cardiac, haematological, neurological and various other disorders. Immunoabsorption columns are also being increasingly recognised as a useful therapeutic option for various chronic and acute disorders such as multiple sclerosis, Guillain-Barre, myasthenia gravis, chronic inflammatory demyelinating polyneuropathy and autoimmune encephalitis. Using immunoabsorption columns, plasma components are separated by adsorber systems that are designed to selectively bind immunoglobulins. The preservation of plasma proteins, such as coagulation factors, albumin and lower shift of blood volumes, during a procedure is one of the advantages of immunoabsorption columns over other conventional techniques such as plasma exchange.

Various different adsorbers, such as tryptophan, protein A or polyclonal sheep antibodies, can be used alone with immunoabsorption columns. Immunoabsorption columns with protein A or sheep antibodies enable more selective removal of immunoglobulins as well as regenerating mechanisms. Most of the modern

immunoabsorption columns contain 2 columns that undergo alternating loading and regeneration cycles, which assists in saving time for even larger blood volumes to be processed.

Global immunoabsorption column includes Asahi Kasei, Fresenius Medical Care Adsorber, etc. Global top 3 companies hold a share about 80%. North America is the largest market, with a share about 40%, followed by Europe and Asia-Pacific with the share about 30% respectively.
