Abstracts

Immunoprotein is an immunologically active protein, which provides immunity against pathogenic organisms or substances. These proteins form the integrated body system of tissues, organs, cells, or cell products that neutralize antigens. They enable the diagnosis of various diseases, such as cardiovascular, oncology, infectious diseases, and others, as they display an abnormal increase in their concentration when in a diseased state.

Scope of the Report:

This report studies the Immunoprotein Diagnostic Testing market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Immunoprotein Diagnostic Testing market by product type and applications/end industries.

The increasing use of immunochromatography-based cassette kits or test strips is estimated to be one of the primary growth drivers for the global immunoprotein diagnostic testing market till 2023. Immunochromatography is the chromatographic method of immunoassay. It follows the lateral flow testing. It helps in the detection of infectious diseases, oncology, and autoimmune diseases using immunoproteins. The principle behind the working of immunochromatography is similar to the enzyme-linked immunosorbent assay (ELISA) test. These tests and reagents will improve the efficiency of diagnosis of diseases. Furthermore, several companies are investing heavily in research and developmental activities to develop products that reduce the time required to generate results.

The global Immunoprotein Diagnostic Testing market is valued at 15900 million USD in 2017 and is expected to reach 23700 million USD by the end of 2023, growing at a CAGR of 6.9% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Immunoprotein Diagnostic Testing.
