The impact kitchen receipt printer is a professional printing device used in the catering industry, mainly used for printing orders in the kitchen. It uses impact printing technology to form characters or patterns on paper by tapping the ribbon with a pin print head. Because its printing principle does not rely on thermal paper, but uses ordinary paper or carbon ribbon paper, it can work stably in harsh environments such as high temperature, humidity and oil smoke, which is particularly suitable for use in restaurant kitchens. Impact kitchen receipt printers are generally durable and low maintenance. The printed content is clear and long-lasting, and it is not easy to fade due to heat or humidity. Therefore, it is widely used in kitchens and catering environments where long-term preservation orders or labels need to be printed.
