According to our (Global Info Research) latest study, the global Impact-modified PMMA market size was valued at USD 355 million in 2022 and is forecast to a readjusted size of USD 514.8 million by 2029 with a CAGR of 5.5% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

PMMA is excellent in impact resistance compared to general glasses, but relatively lower among plastics so it is demanded to be improved in this respect. Eg: LG MMA has improved the impact resistance of PMMA using acrylic rubbers, and maintained the weatherability. Impact resistant grade of PMMA is applied to the area where impact strength is required such as signboards, lightings, displays, and vending machines. In addition, by maintaining high gloss, excellent color, outstanding scratch resistance and great weathering resistance, it can be widely applied to electrical and electronic parts, as well as deco sheets.
