Abstracts

The global Impact-modified PMMA market size is expected to reach \$ 514.8 million by 2029, rising at a market growth of 5.5% CAGR during the forecast period (2023-2029).

PMMA is excellent in impact resistance compared to general glasses, but relatively lower among plastics so it is demanded to be improved in this respect. Eg: LG MMA has improved the impact resistance of PMMA using acrylic rubbers, and maintained the weatherability. Impact resistant grade of PMMA is applied to the area where impact strength is required such as signboards, lightings, displays, and vending machines. In addition, by maintaining high gloss, excellent color, outstanding scratch resistance and great weathering resistance, it can be widely applied to electrical and electronic parts, as well as deco sheets.

This report studies the global Impact-modified PMMA production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Impact-modified PMMA, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
