## Abstracts

According to our (Global Info Research) latest study, the global Implant Grade PEEK market size was valued at US\$ 491 million in 2025 and is forecast to a readjusted size of US\$ 686 million by 2032 with a CAGR of 4.9% during review period.

In 2025, global implant grade PEEKX production reached approximately 955 tons, the average price is 500 usd/kg. Implant grade PEEK refers to polyetheretherketone materials that meet the requirements for long-term implantation of medical devices into the human body. It is a high-performance special engineering plastic, based on PEEK inherent excellent performance (such as high strength, fatigue resistance, radiolucency), must pass strict biocompatibility testing and certification to ensure its long-term safety and stability in the human body.

### Market Concentration and Key Players:

Internationally, the market concentration of implantable PEEK is relatively high, mainly concentrated in developed countries such as Europe, America and Japan. For example, large manufacturers such as Ensinger and Evonik Industries; from a domestic perspective, implantable PEEK still has a lot of room for development.

### Manufacturing Processes and Market Trends:

The implant grade PEEK market is a highly concentrated global market, with core technologies and market share dominated by a handful of international chemical giants. The market concentration is very high, and the head enterprises have formed significant entry barriers by virtue of long-term R & D accumulation, strict production process

control and global medical device certification system. Currently, key players worldwide include Vigus UK, inventor and global market leader of the material, Evonik Group Germany, which provides the high-performance implant grade PEEK resin brand, and Solvay Group Belgium, which is also an important supplier of specialty polymers. In addition, Ensinger Austria as a professional profile processor provides PEEK semi-finished products that meet medical standards. In China market, local enterprises are actively catching up. For example, Jilin Zhongyan Co., Ltd., Zhejiang Pengfulong and other companies have realized the industrialization of medical grade PEEK resin and gradually entered the domestic and foreign medical device supply chain. Overall, the market is dominated by a few international giants, while the rise of China's local suppliers is gradually changing the global supply chain landscape.
